

Credo im Gravitas e Momentum

by Bob Boucher, Jan. 2011

I believe in Newton's Laws
whose forces are unseen.
Gravity and Momentum
keep our feet upon the ground
and the ground beneath our feet.
They control the moon and tides,
keep the clouds up in the sky,
the planets in their orbits,
make the sun shine every day.

Credo in gravitas e momentum
The laws of the universe
they are everywhere obeyed,
The laws of mere man
are seldom obeyed.
